Subject: Status of the Reclamation of the East Mountain Access Road to the Emergency Drill Holes, Crandall Canyon Mine, Genwal Resources, Inc., Emery County, C/015/0032

Dear Mr. Shaver:

A Division inspection was last conducted of this reclamation work on October 25, 2011. At that time, the backfilling and grading had progressed to within 80 ft. of the SITLA/USFS boundary on the emergency access road and the Division recommended installation of excelsior logs below the site of the reclaimed French Drain. USFS staff were at the site on October 27 and provided the Division with photographs of backfilling completed by that date, but reported little progress on the re-establishment of the 2 ft. wide foot trail. Further inspection by the Division and USFS was not possible due to weather conditions.

Please provide confirmation to the Division that the following items were completed as mentioned in your email dated November 2, 2011:

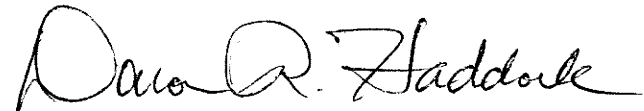

- The SITLA and USFS portions of the access road were reclaimed all the way to the red gate on the existing Forest Road 145.
- The last of the seed would be scattered on November 2, 2011.
- The last of the straw would be distributed over the seed by November 4, 2011.
- Approximately \$10,000 would be retained for a crew to return to the site next year to establish the foot trail as required by USFS Special Use permit PRI 108 (Attachment 12 of Appendix 5-22A to the MRP).

The replacement position of the trail was denoted on a map sent via email to the Division and forwarded to you on October 5, 2010. The Division will continue to work with you to coordinate the re-establishment of the trail with Seth Wallace, Forest Engineer on the Manti LaSal staff.

Sincerely,

A handwritten signature in black ink, reading "Daron R. Haddock". The signature is fluid and cursive, with the first name "Daron" being more prominent and the last name "Haddock" following in a similar style.
